Date :2009-09-01 version 1. This book is divided into six chapters. the system describes the structure and properties of plastic materials. plastic forming the basic theory. the main methods and computer technology simulation. a comprehensive exposition of the common structure of plastic and specialty plastics. performance. and the main purpose of forming process. reflecting the modern plastic engineering of new technologies and new materials development. This book is for materials science and engineering colleges materials processing engineering professional written materials. also available in plastic processing and application of design of plastic products. plastic products processing management process design and die design and other related scientific and technical workers officers. Contents: Introduction table of commonly used plastics in the English Chapter 1 Introduction Section 1 Section 2 A Brief History of plastic plastic section 3 the classification of the composition of the structure of Chapter 2. Section 1 of polymer structural characteristics of polymer Section 2 short-range structure of the polymer chain polymer Section 3 Section 4 of the remote structure of crystalline polymer structure in Section 5 the orientation of polymer molecular structure of Section 6 Section 7 of the liquid crystal structure of polymer blends Chapter 3-state structure of woven plastic mechanical behavior outlined in Section 1 Section 2 of the time-dependent mechanical properties of plastics in section 3 the temperature dependence of the mechanical properties of the plastic section 4 plastic viscoelastic mechanical model in Section 5 of the yield and plastic Section 6 break the plastic melt rheology behavior of Chapter 4 Section 1 of the plastic forming the plastic forming the basis of thermodynamic plastic forming section 2...
